V. Comprehensive Risk Assessment

Not applicable. The CBIRC has not yet conducted comprehensive risk assessment for insurance groups.

VI. Risk Management

The Group proactively strengthens risk management of its member companies, implements applicable regulatory requirements, and constantly enhances management of group-level risks including risk contagion, the risk due to an opaque organizational structure, the concentration risk, and risks in non-insurance areas.

(I) Risk Contagion

Risk contagion refers to a situation where the risk created by a member of the Group spreads to another member of the Group by means of intercompany transactions or other activities, causing losses to such other member.

As the Group promotes synergies in integrated finance, in order to prevent intra-group risk contagion, the Group has strengthened management and coordination across the Group by building firewalls, managing related party transactions, outsourcing and cross-selling, and centralizing branding, communication, and information disclosure. The management of risk contagion within the Group has been fully improved.

The Group has built robust firewalls, including legal-entity firewalls, finance and treasury firewalls, information firewalls, and personnel management firewalls, between the Group and its subsidiaries and among its subsidiaries to prevent risk contagion.

Firstly, legal-entity firewalls. The Group and its subsidiaries have robust governance structures. The Group itself engages in no specific business activity. The Group manages its subsidiaries through shareholding, but neither participates in nor intervenes in the subsidiaries' routine business. The subsidiaries carry out business activities independently, and are supervised by their corresponding regulators

Secondly, finance and treasury firewalls. The finance and treasury frameworks and management policies of the Group and its member companies all meet the requirements for finance and treasury independence, including personnel independence, procedure independence, account independence, accounting independence, fund operation independence, and system authority independence, as detailed below:

(1) The Group and its members have independent finance functions, and have financial positions aligned with their own business scale, management model, and risk profiles, in line with the principle of separating incompatible roles. Qualified financial personnel who meet relevant employment standards are in place. Senior finance managers are appointed and engaged separately, and may not take concurrent offices. The appointment, transfer and resignation of the financial director shall meet the relevant regulations of the corresponding regulators and go through relevant procedures as required by the regulators.

(2) The Group has established and improved a series of financial management procedures. The members of the Group may develop their financial management procedures in line with their own industry regulations and business plans with reference to the Group's financial management procedures.

(3) The Group and its member companies perform independent financial accounting. Each member is audited by an external auditor, with an independent financial audit report issued.

(4) The Group and its members implement strict management segregation over the data in the financial and treasury information systems, including the storage, access, modification and use of the data. Moreover, the allocation of access permissions to users follows rigorous examination and approval procedures, and is managed according to the principles of mutual exclusion of posts and minimization of rights to prevent unauthorized activities.

(5) The funds of the Group and its member companies are managed separately. The funds of the Group and its members shall comply with regulatory requirements. Unauthorized fund borrowings and transfers between the Group and its members are forbidden. Strict segregation is ensured between insurance funds and non-insurance funds as well as between proprietary funds and client funds. Independent management and operations are implemented in account management, financial accounting, fund settlement and other relevant processes to avoid appropriation of funds of other categories. Mechanisms for hierarchical examination, approval and review of finance accounts, transactions, and reconciliation have been established and improved to prevent fund risks.

(6) The Group strictly restricts the cross-guarantee and other credit enhancement behaviors among the members through the well-established procedures. Reasonable cross-guarantee risk limits for the members have been set, and the monitoring and early warning mechanism has been established to preclude the accumulation and transmission of risks among the members.

Thirdly, information firewalls. The Group has established the governance structure with three lines of defense for information security. Member companies have established information security departments to strictly implement the Group's information security policies for effective information segregation. Attaching great importance to the information security of its customers, the security of its products, and the online security of its businesses, the Group has set up and effectively implemented the mechanisms for comprehensive security monitoring. In strict accordance with applicable laws, regulations and standards including the *Cybersecurity Law of the People's Republic of China* and the *Data Security Law of the People's Republic of China*, the Group has improved its personal data authorization management system and implemented the principles of information access control and separation of duties. Moreover, the Group carries out corresponding protection measures for information of different sensitivity levels based on the information classification standards, protecting the confidentiality, integrity, and availability of customer information. The Group implements strict management segregation over the data of its subsidiaries. The allocation of access permissions to users follows rigorous examination and approval procedures, under the principles of mutual exclusion of posts and minimization of authorities, with unauthorized activities being prohibited. In addition, the Group reduces the risk of sensitive information leakage through shield of the sensitive information display in the application systems, sensitive database encryption, and database auditing. Moreover, the Group adopts cutting-edge technologies, including artificial intelligence (AI) and cloud computing, and security measures in terms of infrastructure, terminals, business and people to effectively protect customer information security. Furthermore, the Group has been raising awareness of information security and builds a culture where everyone is responsible for information security. The Group is committed to building a secure and innovative financial services ecosystem.

Fourthly, personnel management firewalls. The Group and its subsidiaries have separate organizational structures. Rules were set to clarify limitation to employee behaviors, standardize the double-jobbing of senior management and employees and strengthen the avoidance of relatives. In addition, systems were built to manage conflict of interests, ensuring that each employee does not perform incompatible roles with potential conflict of interests at the same time. Moreover, an insurance company's senior management may not concurrently serve as the senior management of non-insurance subsidiaries (unless otherwise stipulated by laws, regulations and the CBIRC).

The Group has constantly improved the management of related party transactions. The Group and its subsidiaries such as the insurance companies, bank, trust company, securities company, fund management company, and asset management company constantly enhance the management of related party transactions in strict accordance with laws and regulations as well as the requirements of regulators on related party transactions. The Related Party Transaction Control and Consumer Rights Protection Committee and the Related Party Transaction Management Office of the Group operate effectively. The Group has constantly optimized the management structures and mechanisms, strengthened the implementation of rules, improved the management procedures, and enhanced related party transaction identification, review and fair value-based pricing to ensure fair pricing for related party transactions. The Group continues to increase transparency by disclosing and reporting related party transactions in strict accordance with regulatory rules. The Group has further improved system-based related party transaction management to empower routine management. Furthermore, the Group has developed a culture of strong compliance awareness for related party transactions through training and education. The Group's related party transaction management systems and mechanisms have been strengthened and operated effectively.

The Group has improved its approach to outsourcing. The Group complies with applicable laws, regulations and regulatory documents to carry out outsourcing management. Currently, Ping An Technology and Ping An Financial Services provide the Group's members with outsourced services. The outsourced services provided by Ping An Technology include IT advisory services, development, application system operations and maintenance, call center services, office support and information security. The outsourced services provided by Ping An Financial Services include shared financial and treasury services, comprehensive HR services, customer services, and audit services. The Group's members can outsource their business in accordance with their own operation and management needs. The core business of insurance companies shall not be outsourced. The member companies follow the principles of independent transactions and fair pricing for the outsourcing, and performs corresponding approval procedures in accordance with the related regulations and management rules for related party transactions. Moreover, the Group's members sign agreements on the service scope, the service terms, the charging methods, the reconciliation methods, the settlement frequencies, rights and obligations, and liability for breach of agreements. The transactions shall be reported and disclosed according to applicable regulatory requirements. Moreover, the Group has also improved the outsourcing follow-up management, strengthened risk monitoring, and reviewed services and duty performance on a regular basis. The Group has established communication and service evaluation mechanisms. Service providers solicit feedback on satisfaction from beneficiaries on a regular basis, and conduct internal appraisals on the basis of such feedback to ensure constant service improvement.

The Group has enhanced the management of integrated financial services. The Group's retail integrated financial service business mainly involves distribution of insurance products by concurrent agents. Such agents distribute products in an orderly manner under concurrent agency agreements in accordance with laws and regulations. If customers have demands for products beyond agents' offerings, customers may visit platforms of other Ping An subsidiaries for information and purchase through online apps. The Group's corporate integrated financial business consists of the insurance business agency mechanism and the other business referral mechanism. The insurance business agency mechanism is managed in strict compliance with the agency rules and regulations. The business referral mechanism only involves facilitation of both parties' intentions to cooperate. Cooperation is conducted in strict accordance with market practices. All businesses are reviewed independently by each subsidiary's risk control function in line with the firewall policies.

The Group has centralized the management of branding, communication, and information disclosure. The Group has developed robust rules and procedures for brand asset management and information disclosure, and strictly implemented them to ensure centralized management and consistency of branding.

(II) Organizational Structure Non-transparency Risk

The organizational structure non-transparency risk refers to the risk of losses in the Group caused by the complexity or opaqueness of the shareholding structure, management structure, operational processes, and business types.

The shareholding of the Group is scattered, and thus there is no controlling shareholder, nor de facto controlling party. The shareholding structure of the Group is clear. The Group has established a complete corporate governance structure in accordance with laws and regulations such as the *Company Law of the People's Republic of China* and the *Securities Law of the People's Republic of China*, with international corporate governance norms and the Group's situations taken into account. The General Meeting of Shareholders, the Board of Directors, the Supervisory Committee, and the senior management have exercised their rights and performed their obligations in accordance with the *Articles of Association*. The Group itself engages in no specific business activity, while its subsidiaries engage in various businesses including insurance, banking, investment, and technology. The Group manages the subsidiaries through shareholding, but neither participates nor intervenes in the subsidiaries' routine business. The Group and its subsidiaries have clearly defined roles and responsibilities of their respective functions, which are independently operated and well coordinated subject to checks and balances. There is no overlap, absence, or overconcentration of powers and responsibilities. The Group has a clear shareholding structure, a complete governance structure, and a transparent management structure.

(III) Concentration Risk

The concentration risk refers to the risk that members' single or combined risks, when aggregated at the Group level, may directly or indirectly threaten the Group's solvency position. The Group manages the concentration risk in counterparties, the investment asset portfolio, insurance business, and non-insurance business.

In order to further manage the concentration of counterparties and investment assets, the Group revised and issued the *Administrative Measures for Concentration Risk in Investment Assets.* Taking the regulatory requirements that the Group and its members must comply with as the bottom line, the *Measures* aims to improve the risk limits and management mechanisms. Moreover, the Group further deepened the internal control requirements based on its development strategies and risk appetite to strengthen the Group's supervision and guidance over the diversified investment of members.

To manage the concentration risk in counterparties, the Group has specified a set of concentration risk limits for counterparties, taking into account the risk characteristics of industries, categories of counterparties as well as the risk appetite and tolerance of the Group. The Group's risk limits cover non-retail counterparties in its investment and financing businesses. The Group has sorted out and identified relations of counterparties, and established unified and combined concentration limit management for customers in the same group. Moreover, by adopting advanced technologies, the Group has been improving the breadth and depth of the concentration risk management, increasing its monitoring frequency, and warning against counterparties with higher concentration risks promptly.

To manage the concentration risk in the investment asset portfolio, the Group's insurance subsidiaries have set concentration limits for investment in asset classes that meet regulatory requirements and business objectives based on their risk appetites and strategic assets allocation plans. These limits include but are not limited to upper limits for the proportions of equity assets, real estate assets, self-use real estate, and other financial assets. Moreover, the Group and related members have set region-specific concentration limits in accordance with the CBIRC's regulations, including but not limited to upper limits for the proportions of overseas investments and emerging market investments. In addition, the Group formulates a unified industry management strategy based on industry research and regulatory policies each year to guide members' investment industry portfolio allocation, control the concentration risk posed by high-risk industries, and optimize the customer mix in high-risk industries. The Group has regularly reviewed the management of concentration risk posed by the investment asset portfolio at the Group level and the member company level. By doing so, the Group prevents any solvency risk or liquidity risk arising from overconcentration of the Group's investment assets in certain industries, asset classes or regions.

The Group manages the concentration risk in insurance and non-insurance businesses. The Group evaluates, analyzes, monitors and reports the concentration of its businesses in accordance with the CBIRC's rules for concentration risk management of an insurance group's insurance and non-insurance businesses. Regarding the concentration of insurance business, the Group has enhanced the framework of concentration risk limits for reinsurance counterparties, risk monitoring, risk analysis, and risk warning by implementing the reinsurer credit and concentration management procedures. Regarding the concentration of non-insurance businesses, the Group has analyzed the mix and risk profiles of non-insurance businesses in the routine risk management framework. The Group has effectively prevented the concentration risk through regular evaluation, monitoring, and warning of the concentration risk in insurance and non-insurance businesses.

(IV) Non-insurance Risk

As an integrated financial service group authorized by the State Council to engage in separate operations under a listed holding group subject to separate regulation, the Group has established independent legal entities that engage in insurance, banking, investment, and technology businesses respectively. Regarding corporate governance, all the subsidiaries in non-insurance areas carry out specialized operations independently, and are supervised by their respective regulators; the Group ensures that all the non-insurance subsidiaries are effectively segregated from the insurance subsidiaries in terms of assets and liquidity.

For equity investments in non-insurance businesses, the Group has developed rules, standards and limits, established processes for investment decision-making, risk management, investment review, evaluation and reporting, and specified mechanisms for management before, during and after investment deals. Moreover, the non-insurance subsidiaries strictly follow the Company's strategic planning process to analyze the feasibility of business strategies, regularly review the ROICs, investment payback periods, business and financial performance as well as valuations, and evaluate the risk-return profiles of various businesses.

VII. Liquidity Risk

Liquidity risk refers to the risk of the Company being unable to obtain sufficient cash in time, or being unable to obtain sufficient cash in time at a reasonable cost, to repay debts that have become due or fulfill other payment obligations.

In accordance with domestic and international regulatory requirements, the Group developed and regularly updated the *Liquidity Risk Management Plan of Ping An Insurance (Group) Company of China, Ltd*. (LRMP). The Group has also established a liquidity risk management framework and applicable policies covering risk appetites and limits, risk strategies, risk monitoring, stress testing, emergency management, and management assessment. Ping An has constantly improved its management procedures and processes for better identification, evaluation, and management of liquidity risk for the Group and its members.

Under the Group's principles and guidelines for liquidity risk management, subsidiaries have developed their own liquidity risk appetites, risk indicators, and risk limits in line with the applicable regulations, industry practices, and features of their business activities. The Group and its subsidiaries have established robust liquidity risk information systems and liquidity monitoring and reporting procedures for adequate identification, accurate measurement, continuous monitoring, and effective control of liquidity risk in various business activities. The Group coordinates its subsidiaries to regularly evaluate liquid assets and maturing debts, conduct stress tests of cash flows, and carry out forward-looking analysis of liquidity risk for a certain period in the future to identify potential liquidity risk and take measures to control liquidity gaps.

The Group and its subsidiaries have established liquidity reserve policies and maintained stable, convenient, and diverse sources of financing to ensure that they have adequate liquidity to tackle possible impacts from adverse situations. Moreover, the Group and its subsidiaries have developed robust liquidity contingency plans for handling any significant liquidity events. The Group has set up internal firewalls to prevent the intra-group contagion of the liquidity risk.

VIII. Regulatory Measures Taken by Regulators against the Company

(I) During the reporting period, did the CBIRC take any regulatory measures against the Company? (Yes□ No■)

(II) The Company's remedial measures and the implementation of such measures (Not applicable)
